Another New Interface in the Cards for OneBridge

Card Payment Processor Continues to Expand Its Reach Into the Credit Union Market

INDIANAPOLIS (April 14, 2009) – OneBridge, Inc., a credit and debit card processor for credit unions nationwide, today announced that they will be migrating a current client to a real-time interface with Symitar's™ Episys® system. Heritage Federal Credit Union in Newburgh, Indiana is planning to go live with the interface later this year. The credit union will be utilizing the interface for their in-house Visa credit and debit card programs.

"Our stated strategy as we continue to grow is to expand our core relationships," said Jim Kern, OneBridge President. "This conversion opens up an entirely new account processing endpoint for us for both existing clients contemplating a core change and new credit union clients. We're also proud that our longstanding relationship with Heritage has led to this interface and we look forward to working with Symitar in the future."

About OneBridge

OneBridge provides financial institutions with complete, one-stop card processing solutions to help them maximize the value of their in-house credit, debit and ATM programs. With dynamic authorization options, effective risk management, competitive rewards programs, and an internet based user interface, OneBridge is focused on helping institutions gain control of their card programs.

OneBridge, a privately owned corporation founded in 1994, is headquartered in Indianapolis. *One* signifies a single, trusted source of knowledge, and *Bridge* represents connections and opportunities.
