OneBridge Goes Live With UltraData® Enterprise *Card Payment Processor Extends Footprint in Credit Union Market*

INDIANAPOLIS (November 20, 2008) – OneBridge, Inc., a credit and debit card processor for credit unions nationwide, announced today that it has converted a long time client to a real-time interface with Harland Financial Solution’s UltraData® Enterprise, a core processing solution for credit unions.

As part of their conversion to the UltraData Enterprise solution, Capital Credit Union, headquartered in Bismarck, North Dakota, went live with the interface for their in-house Visa credit card program. Doreen Ottemoeller, Vice President of Finance for Capital Credit Union, said “The OneBridge piece of the conversion went very smoothly. We dealt with many vendors throughout the conversion and OneBridge was among the best and most reliable. Their reliability and diligence were to be admired.”

“Capital Credit Union and OneBridge have had a longstanding relationship”, said Alan Kotke, OneBridge Vice President of Account Management. “Even though we did not have a productive interface to UltraData Enterprise at the time, Capital Credit Union signed a long-term contract renewal with us months prior to their conversion. It was definitely a vote of confidence in our business relationship and we simply delivered as promised. OneBridge is delighted we could build even greater trust with Capital.”

About OneBridge

OneBridge provides financial institutions with complete, one-stop card processing solutions to help them maximize the value of their in-house credit, debit and ATM programs. With dynamic authorization options, effective risk management, competitive rewards programs, and an internet based user interface, OneBridge is focused on helping institutions gain control of their card programs.

OneBridge, a privately owned corporation founded in 1994, is headquartered in Indianapolis. *One* signifies a single, trusted source of knowledge, and *Bridge* represents connections and opportunities.
